SUTRA DENTAL SPA INTRODUCES NEW ADVANCED TECHNOLOGY

-Cosmetic dental spa adds state-of-the-art handheld SIROLaser-

La Mesa, CA (November 29, 2006) Sutra Dental Spa, a new cosmetic dental practice in La Mesa that fuses spa comfort with the latest technology, introduces SIROLaser to its plethora of services.

The versatile SIROLaser is a diode laser that provides optimum performance for all areas of application and can be used for endodontics, periodontics or dental surgery. This compact handheld device is on the cutting edge of technology and offers many benefits like high precision during surgery, precise tissue removal, minimum damage to surrounding tissue, minimum trauma bleeding, ensuring a better view of the operating site, effective protection against infection, minimal scar formation, reduction of the need for anesthesia, and virtually no postoperative wound pain.

"We are excited to be offering SIROLaser to our patients. At Sutra Dental Spa our goal is to always ensure our patients are being treated with the best technology the industry has to offer," said Dr. Jimmy C. Wu, D.D.S. and founder of Sutra Dental Spa. "This technology will make treatments that are generally very uncomfortable feel nearly painless."

This state-of-the-art technology goes hand in hand with Dr. Wu's philosophy on patient care ensuring that each visit is relaxing and comfortable. Adorned with Buddhist statues and Asian art, Sutra Dental Spa offers patients an atmosphere of total comfort with a Zen oxygen bar, virtual reality movie glasses, aromatherapy pillows and blankets, an ambient recovery room equipped with a full body massage chair, wireless intraoral cameras, and a massage therapist.

Aligning with Buddhist teachings, called "Sutras," the Asian-inspired office exclusively uses biocompatible materials for non-toxic and non-invasive remedies in its four state-of-the-art treatment rooms. Services include teeth cleaning, preventative care, digital x-rays, CEREC, periodontics, endodontics, smile makeovers, veneers, implants, Invisalign, and cosmetic imaging. With the use of such technology as CEREC, patients are able to complete crown

-more-

restorations in one day versus the traditional way that can take several weeks.
